RE: Plan of Operations Amendment

RECEIVED

APR 19 2004

DIV. OF OIL, GAS & MINING

PLAN OF OPERATIONS AMENDMENT

Rock-It Stone Works, LLC Strawberry River Quarry

Rock-It Stone Works would like to amend its plan of operations in the following areas:

- 1) Due to the larger than expected amount of overburden on top of the quarry, dirt will be moved and piled to the north rather than pushed over the edge to the south. This also will make screening and reclamation easier and more efficient.
- 2) Starting Spring of 2004, the south-west corner of the quarry will be filled and reclaimed. The hole left from stone removal will be filled with overburden material and topped with screened top soil.
- 3) The drainage to the north and west of the quarry will be left open and unfilled. The mouth of the drainage used as an access to the top will be built-up to divert future flooding from reaching the river. A stone silt fence will be erected approximately 4 feet high to catch debris and divert water to the east.

These proposed improvements to begin 2004. Stockpiling of overburden north of the quarry sites will be ongoing. Items 2 and 3 will be completed in October and May respectively.
